The feedback taken from the students, employers, parents, teachers and alumni were collected for understanding the quality of education classroom and beyond the classroom as part of the course curriculum of various programmes offered by Post Graduate Departments functioning on the Saurashtra University campus.

The analysis of the procured feedback was done very systematically with the help of statistical tools and necessary conclusions were drawn. Alumni were in favour of modifying syllabus in way that it should be more practical oriented. However, majority of the stakeholders were happy with the present content of the syllabus.
